New ATI FirePro™ 2450 Multi-Display Graphics featured with Dual DX10.1 GPUs, Quad Displays, Consumes Minimal Power and Low Profile Design

**Taipei — Mar. 18, 2009** —Sapphire Technology today announced the [ATI FirePro™ 2450](#) is now available. The [ATI FirePro™ 2450](#) Multi-View workstation graphics accelerator is featured with the latest technologies of ATI's Multi-View series for enterprise-level multi display solutions.

**The special features of ATI FirePro™ 2450 as below:**

- PCI-E 2.0 x1 and x16 configurations: provides great flexibility for installation in widest range of system.
- Dual DX 10.1 GPUs, full 10-bit precision display pipeline
- Quad DVI-I (or VGA) Displays Supported
- Up to 512MB GDDR3 on-board—High performance for graphics intensive application and full windows Vista® Aero Support.
- Low Power Consumption: An average of 17W power consumption enables use in smaller, more energy efficient systems.
- Low profile (half length) design—allows installation in notebook docking stations, small form factor or full height systems.
- Unified Driver architecture—Helps to simplify maintenance and system administration
- Variable fan cooling—Maximize the life-cycle of the Workstation Graphics board which increasing in reliability and stability of the enterprise environment.
- Hardware acceleration of DX 10.1 & OpenGL 2.1 advanced features.

- Windows XP, XP64, Windows Vista, Vista64, Linux 32 and Linux 64

“The ATI FirePro 2450 offers the reliability professionals expect and the efficiency IT departments require. IT managers want a card they can test once, deploy virtually anywhere, and count on to run reliably,” said Janet Matsuda, senior director, AMD Professional Graphics. “The low power consumption enables cool, energy-efficient operation, as well as superior reliability and longevity. The compact form factor can be deployed in nearly any system. This accelerator is perfect for customers who need more than two displays, such as in financial services and process control.”

## **SAPPHIRE** About Sapphire

Sapphire Technology Ltd designs, manufactures and distributes the most complete range of ATI Radeon™ based video graphics accelerators worldwide. Additionally Sapphire produces mainboards based on AMD chipset technology. Sapphire is based in Hong Kong with two ISO9001 and ISO14001 manufacturing facilities in Dongguan, China. The factories have a total capacity of 1.8 million graphics boards per month. Sapphire currently employs over 3000 employees worldwide with local representation in North America, Europe, South Africa and Asia Pacific.

2007, Sapphire has been authorized to be the exclusive partner of AMD Workstation Graphics (ATI FirePro™, ATI FireGL™, ATI FireMV™), and AMD FireStream in APAC except Japan. This great affirmation shows Sapphire's achievement and offering, Sapphire will provide best service to professional customer with the best workstation products.
